Election/Restriction

I. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-2, drawn to in a method for providing emergent and flexible workflow management to a first user, the first user communicating with other users, the first user using a first message-based system having embedded information management resources, classified in class 709, subclass 206.

II. Claims 3-8, drawn to a system for managing and tracking information items within a first message-based system, the first message-based system being one of a set of message-based systems within a workgroup, classified in class 718, subclass 101.

II. The inventions are distinct, each from the other because of the following reasons Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for providing emergent and flexible workflow management of messages, invention II has separate utility such as a system for managing and tracking information items within a message. See MPEP. § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

5. During a telephone conversation with Richard B. Domingo, attorney, on 3/1/05 to request an oral election to the above restriction requirement, but did not result in an election being made.
